OBJECTIVE

Final-year Computer Science and Design student specializing in **full-stack development** using **React.js**. Experienced in building scalable applications across frontend, backend, databases, and deployment pipelines. Seeking an entry-level role to contribute to real-world engineering systems.

EDUCATION

Bachelor of Engineering in Computer Science and Design

Expected 2026

New Horizon Institute of Technology and Management, Thane

SKILLS

Languages	JavaScript (ES6+), Typescript, SQL, HTML5, CSS3, Python
Frontend	React.js, Next.js (App Router), Redux Toolkit (RTK), Tailwind CSS, Shadcn UI, React Router
Backend & CMS	Strapi (Headless CMS), REST API Integration, Next.js API Routes, Flask, Webhooks (HMAC Verification), GitHub API
Database & Storage	PostgreSQL, MySQL, Supabase, Neon, Cloudinary, Microsoft Excel
Deployment & DevOps	Vercel, Railway, Hostinger, Docker, .env, Domain & Hosting Configuration, .htaccess
AI & Data	Large Language Models (LLMs), Prompt Engineering, Agentic AI Systems, Multi-Agent Workflows (CrewAI), Context Handling, Data Cleaning, EDA, Data Visualization
Tools	Git, GitHub, VS Code, Vite, Docker, WinSCP

EXPERIENCE

Full Stack Developer Intern (React.js)

Blood Nexus Studios, Thane, India | Feb 8 – Mar 23, 2026

- Developed a dynamic CMS-driven web application using **React.js** and **Strapi (Headless CMS)** for scalable content management
- Designed and integrated **REST APIs**, enabling seamless data flow between frontend and backend
- Managed databases using **PostgreSQL (Supabase/Neon)** and handled data migration and optimization
- Implemented media storage and delivery using **Cloudinary**
- Deployed full-stack application using **Vercel (frontend)** and **Railway (backend)**
- Configured hosting, routing, and server environments using **.htaccess** and tools like **WinSCP**
- Diagnosed and resolved complex UI issues related to asynchronous data loading and component lifecycle
- Contributed to system design decisions and overall application architecture
- Improved development workflow efficiency by automating content updates and deployment processes

PROJECTS

AI Tech Lead – Agentic AI GitHub App for Code Review & Test Generation

Python, Flask, CrewAI,

Gemini, Docker

- Built an installable **GitHub App** to automate PR reviews and test generation
- Designed a **webhook-based system** with secure HMAC signature verification
- Implemented **multi-agent workflow (CrewAI)** for code review and pytest generation
- Integrated **Gemini LLM** and GitHub APIs to analyze diffs and post feedback
- Used **asynchronous processing** and Docker for reliable and scalable execution
